

ROOFSUPPORTHOME

guaranteed safe

ROOFSUPPORTHOME

Optimal safety and ease of installation

RoofSupport cable duct is an ideal solution to safely guide cabling behind solar panels to the inverters.

WHY ROOFSUPPORT HOME?

Safe maintenance

Convenient size of 30x35 mm available in 3-metre lengths.

Easy installation

With the CLICK connection to the RSC roof supports, the system can be installed with the minimum effort and without tools.

The right alternative

Thanks to the use of cable ducts, RoofSupport Home is the correct alternative to pipes, as condensation water must be drained from pipe in accordance with HD-IEC 60364

Guaranteed fireproof

Fire safety is ensured as positive and negative lines do not run alongside each other in the conduit. This avoids any insulation errors.

Available nationwide

RoofSupport Home is available from electrical and solar wholesalers nationwide.
