

PVTILE

innovative simplicity

PVTILE

No more damage to solar panel wiring

PVtile's standard adapter plate combined with the conduit cap provides a safe and weatherproof cable feed from the solar panels to the roof boarding. The standard adapter plate fits directly under roof-mounted solar panel systems, in combination with various types of roof tiles. This roof conduit is available as a UV-resistant combination of adapter plate and cable feed, in red or anthracite.

WHY PVTILE?

- Conduit conforms with HD-IEC 60364
- Weatherproof conduit for up to 8 cables.
- Safe and easy to install.
- Optimal sealing with an additional foam strip.
- Made of sturdy UV-resistant PVC.
- Windtunnel tested.
