

SOLARCABLE

SOLARCABLE

The perfect cable for solar panel installations

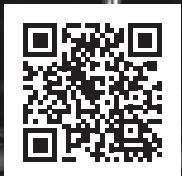

Conduct SolarCable is used to connect solar panels to inverters and PVboxes. The halogen-free outer jacket keeps smoke generation and emissions of toxic/corrosive gases to a minimum in the event of a fire. Good UV resistance makes the solar cable ideal for outdoor applications. The advantage of this is that it will not crack due to dehydration, which often leads to short circuits or earthing faults in the inverter.

WHY SOLAR CABLE?

- UV-resistant, direct burial: suitable for indoor and outdoor use.
- Meets latest PV-system requirements.
- Water resistant (AD8) according to EN50525-2-21.
- Fire retarding according to EN60332-1-2.
- Impact strength (direct burial) according to UL854.
- 25-year warranty.
