

STEP OVER

STEP-OVER

Optimal safety and ease of installation

RoofSupport Step-Over is the solution for safely stepping over cable management systems. It creates a simple bridge on the roof so that maintenance and inspections can be performed safely. Combine our Step-Over with Conduct's wire tray: the ideal combination for optimal safety and ease of installation.

WHY ROOFSUPPORT STEP-OVER?

Safe maintenance

Makes the maintenance and inspection of solar panel installations safer.

In accordance with the guidelines

Required by occupational health and safety guidelines and HD-IEC 60364.

Simple

Supplied pre-assembled; easy to mount and use.

Widely applicable

Can also be used over wide cable management systems.

Safe in any situation

Anti-slip; safe to use in all weather conditions.

Hot-dip galvanised

Long-lasting corrosion resistance and high resistance to abrasion.

Protected roof structure

Rubber roof supports for protection of roof structure; applicable to any type of roof.
