SEITE 13 - 17

PAGE 18 - 22

PÁGINA 23 - 27

PAGINA 28 - 32

GEREEDSCHAP

MATERIALEN

1

MONTEER PROFIEL N OP PROFIEL L EN M MET 2 BOUTEN (20MM)* EN 4 BOUTEN (25MM)

2

PLAATS BEIDE O-PROFIELEN OP GEWENSTE AFSTAND

Scan voor de montagehandleiding van de gewenste omvormer

3 PLAATS BASISFRAME (K)

4 PLAATS OMVORMERFRAME OP BASISFRAME (K)

5

MONTEER 2 x PROFIEL P ONDER EEN HOEK VAN 45° MET 4 BOUTEN (25MM)

6

PLAATS DAK (Q) OP OMVORMERFRAME EN MOEREN

7

VERZWAAR MET BETONTEGELS

TOOLS

SUPPLIES

1 MOUNT PROFILE N ONTO PROFILES L AND M USING 2 BOLTS (20 MM)^{*} AND 4 BOLTS (25 MM)

2 POSITION BOTH O-PROFILES AT THE DESIRED DISTANCE

Scan for installations manual of the desired inverter

3 POSITION BASE FRAME (K)

4 POSITION INVERTER FRAME ONTO BASE FRAME (K)

5

MOUNT 2 x PROFILE P AT A 45° ANGLE USING 4 BOLTS (25 MM)

6

PLACE THE ROOF (Q) ONTO THE INVERTER FRAME

7

WEIGHT DOWN WITH CONCRETE TILES

WERKZEUGE

KOMPONENTEN

1

PROFIL N AUF L UND M MONTIEREN MIT 2 SCHRAUBEN (20 MM)* UND 4 SCHRAUBEN (25 MM)

2

POSITIONIEREN SIE BEIDE O-PROFILE IM GEWÜNSCHTEN ABSTAND

Scannen Sie für das Installationshandbuch des gewünschten Wechselrichters

3

POSITIONIEREN SIE DEN BASISRAHMEN (K)

4

POSITIONIEREN SIE DEN WECHSELRICHTERMONTAGERAHMEN AUF DEM BASISRAHMEN (K)

5

MONTIEREN SIE 2 × PROFIL P IN EINEM WINKEL VON 45° MIT 4 SCHRAUBEN (25 MM)

6

POSITIONIEREN SIE DAS DACH (Q) AUF DEM WECHSELRICHTER-MONTAGERAHMEN

7

MIT BETONPLATTEN BESCHWEREN

OUTILS

MATÉRIEL

1

MONTE LE PROFILÉ N SUR L ET M AVEC 2 BOULONS (20 MM)* ET 4 BOULONS (25 MM)

2

PLACE LES DEUX PROFILÉS O À LA DISTANCE SOUHAITÉE

Scanne le manuel d'installation de l'onduleur souhaité

3 PLACE LE CHÂSSIS DE BASE (K)

4 PLACE LE CADRE DE L'ONDULEUR SUR LE CHÂSSIS DE BASE (K)

5 MONTE 2 PROFILÉS P À UN ANGLE DE 45° À L'AIDE DE 4 BOULONS (25 MM)

6 PLACE LE TOIT (Q) SUR LE CADRE ONDULEUR ET LES ÉCROUS

7

LESTER AVEC DES DALLES EN BÉTON

HERRAMIENTAS

SUMINISTROS

1

MONTE EL PERFIL N EN LOS PERFILES L Y M CON 2 TORNILLOS (20 MM)*
Y 4 TORNILLOS (25 MM)

2

COLOCA AMBOS PERFILES O A LA DISTANCIA DESEADA

Escanee para obtener el manual de montaje del inversor deseado

3 COLOCA EL BASTIDOR BASE (K)

4 COLOCA EL BASTIDOR DEL INVERSOR SOBRE EL BASTIDOR BASE (K)

5

MONTA 2 PERFILES P EN UN ÁNGULO DE 45° CON 4 TORNILLOS (25 MM)

6

COLOCA EL TEJADO (Q) SOBRE EL BASTIDOR DEL INVERSOR Y LAS TUERCAS

7

LASTRE CON LOSAS DE HORMIGÓN

ATTREZZI

MATERIALI

- 1** MONTARE IL PROFILO N SUI PROFILI L E M CON 2 BULLONI (20 MM)* E 4 BULLONI (25 MM)

- 2** POSIZIONARE ENTRAMBI I PROFILI O ALLA DISTANZA DESIDERATA

SCANSIONARE IL QR CODE PER CONSULTARE LE ISTRUZIONI DI MONTAGGIO DELL'INVERTER DESIDERATO

3 POSIZIONARE IL TELAIO DI BASE (K)

4 POSIZIONARE IL TELAIO DELL'INVERTER SUL TELAIO DI BASE (K)

5

MONTARE 2 PROFILI P CON UN'INCLINAZIONE DI 45° UTILIZZANDO 4 BULLONI (25 MM)

6

POSIZIONARE IL TETTO (Q) SUL TELAIO DELL'INVERTER E FISSARLO CON I DADI

7

APPESANTIRE CON PIASTRE DI CALCESTRUZZO

Plaatsingsrichtlijnen

- Stormbestendigheid: Voor optimale windweerstand, plaats de PVshelter met de zijkant naar het zuidwesten.
- Ballast: Gebruik alle meegeleverde betontegels voor een stabiele montage.
- Vereffening: Zorg voor correcte potentiaalvereffening met een aardrail en vereffeningskits.
- Locatie: Wall-Floor en Wall-versies moeten altijd tegen een muur of gevel worden geplaatst.

Placement Guidelines

- Storm resistance: For optimal wind resistance, place the PVshelter with the side facing southwest.
- Ballast: Use all supplied concrete tiles for a stable installation.
- Potential equalization: Ensure correct equipotential bonding with a ground rail and bonding kits.
- Location: Wall-Floor and Wall versions must always be placed against a wall or façade.

Platzierungsrichtlinien

- Sturmfestigkeit: Für optimalen Windwiderstand den PVshelter mit der Seite nach Südwesten ausrichten.
- Ballast: Verwenden Sie alle mitgelieferten Betonplatten für eine stabile Installation.
- Potentialausgleich: Sorgen Sie für eine korrekte Potentialausgleichung mit einer Erdungsschiene und Ausgleichssätzen.
- Standort: Wall-Floor- und Wall-Versionen müssen immer an einer Wand oder Fassade montiert werden.

Directives d'installation

- Résistance aux tempêtes: Pour une résistance optimale au vent, placez le PVshelter avec le côté face au sud-ouest.
- Ballast: Utilisez toutes les dalles en béton fournies pour une installation stable.
- Équipotentialité: Assurez une liaison équipotentielle correcte avec un rail de mise à la terre et des kits de mise à la terre.
- Emplacement: Les versions Wall-Floor et Wall doivent toujours être placées contre un mur ou une façade.

Directrices de instalación

- Resistencia a tormentas: Para una resistencia óptima al viento, coloque el PVshelter con el lado orientado al suroeste.
- Lastre: Utilice todas las losas de hormigón suministradas para una instalación estable.
- Compensación de potencial: Asegure una correcta equipotencialidad con un carril de tierra y kits de conexión.
- Ubicación: Las versiones Wall-Floor y Wall deben colocarse siempre contra una pared o fachada.

Linee guida per il posizionamento

- Resistenza al vento: Per una resistenza ottimale al vento, posizionare il PVshelter con il lato rivolto verso sud-ovest.
- Zavorra: Utilizzare tutte le piastre di calcestruzzo fornite per garantire un'installazione stabile.
- Equipotential bonding: Garantire un corretto collegamento equipotenziale utilizzando una barra di messa a terra e i kit di collegamento equipotenziale.
- Posizionamento: Le versioni Wall-Floor e Wall devono essere sempre installate contro una parete o una facciata.
